RALPH W. STERLING
CUTCHOGUE, LONG ISLAND, NEW YORK
TELEPHONE PECONIC 55

Cutchogue, L. I., N. Y.,
January 17th, 1928.

TO MY FRIENDS AND CUSTOMERS:

Please accept this, my annual catalog for 1928, with my very best wishes for another good year. May your crops be bountiful, prices fair to all and may the final accounting leave a goodly amount on the right side of your ledger.

Last year was considered a prosperous year by all the writers but our Long Island farmers were hit rather hard, except on a few crops. Potatoes paid well, Brussels Sprouts and Strawberries did also. Otherwise paying crops were few and far between.

Truck crop prices generally go in cycles so we are hoping the returns will be high this year on Lima Beans, Cauliflower, String Beans, Peas, etc.

If you are interested in any of the different truck crops we would be glad to talk things over with you as to amount of seed, fertilizer, time of planting for best prices, or any other item you may wish to discuss.

We try to secure the very best strains of seed, and I am sure our Seed Potatoes, Lima Beans, String Beans, Cucumber Seed, Peas, Brussels Sprouts and Cauliflower will do well for you if conditions do not interfere to a too great extent. As last year plainly showed, we are powerless when weather is too unfavorable.

Thanking you all for the business of the past year and wishing you again the best the season allows, I remain

Yours for Service,

RALPH W. STERLING.

A MUCH ESTEEMED TRIBUTE.

Sterling's Catalog has come: Let no careless hands touch it, mislay it or lose it. It is to stay in one spot, ready at hand, for the gardener studies it every evening. There's no better seeds and plants than Sterling's and there is no better fun than pouring over this book night after night and selecting enough growing things to cover a farm.

No "best-seller" now can touch this catalog. Fifty-four years' experience is back of it—may as many be ahead of it.

From THE L. I. TRAVELER,
J. N. Hallock, Editor.

DIRECTIONS

By carefully reading and observing the following directions, mistakes will be largely avoided.

Please use the enclosed Order Sheet and self addressed envelope if possible. If you need more let me know and I will be glad to send more to you.

Write your name, address and shipping directions plainly.

Always send the cash with your order, unless otherwise agreed upon. Money may be sent by P. O. Money Order, Bank Draft or Registered Letter. Stamps may be sent for amounts under \$1.00, but be sure to put in two-cent stamps, wrapped in waxed paper.

We pay the postage on all seeds sold by the pkt., oz., and $\frac{1}{4}$ lb. Quantities over that are priced net, to be shipped by parcel post, freight or express, at purchaser's expense, unless otherwise stated.

If you desire your seed sent by Parcel Post, add 7c for the first lb. and 1c for each additional lb. of your order, allowing 2 lbs. extra for package. For amount of postage on plants see Plant Department.

By pricing my seeds net, postage extra, you get your seeds delivered for less money than if I quoted a Post-paid price as the 7c per lb. extra would have to be counted in and added to each single lb. priced.

$\frac{1}{2}$ lbs. will be sold at lb. rates; $\frac{1}{2}$ bu. at bushel rates.

No charge is made for packing or packages, except in selling Grass Seed, Peas, Beans, etc. in bulk. Then a charge of 35c each has to be made for the 2 bushel seamless bags. These may be returned if in good condition, charges prepaid and the amount will be credited to your account.

BRUSSELS SPROUT SEED

2 to 3 ozs. will produce enough plants for 1 acre.

STERLING STRAIN. This is a very choice strain of seed selected and grown by the same careful grower that I have had grow this strain for me for a number of years. The plants grow medium tall and this insures a very large crop of choice Sprouts. See testimonials about this strain of seed.

Brussels Sprouts

and gets highest prices for his Sprouts. Per Pkt., 25c; Oz., \$2.00; $\frac{1}{4}$ lb., \$7.50.

All the above seed will be treated with the Hot-Water treatment. We will have a fine lot of plants from the above strains of seed in season. If in need of any place your orders with us.

The seed has been treated with hot water and been tested for germination.

Mr. O. S. Case of Peconic stated to me in Dec. 1926 that Sterling Strain Sprouts were the best he had on his farm that year.

Per Pkt., 25c; Oz., \$2.00; $\frac{1}{4}$ Lb., \$7.00; Lb., \$27.00.

Leslie Strain. A very choice strain grown by G. R. Leslie of Peconic. Ask C. H. Billard about this strain of seed. He uses it

Per Pkt., 25c; Oz., \$2.00;

CAULIFLOWER SEED

2 to 3 oz. will produce enough plants for 1 acre.

KROEMER'S LARGE EARLY ERFURT. Large white heads, heading up quite freely.

In the Cauliflower test run on my farm in 1926 there were over 20 kinds and this kind showed up as one of the very best suited for this section.

Last year was a very poor Cauliflower year, but even so, we had some nice flowers from our Kroemer's Erfurt. The other two kinds that we sold last year could not stand the season and proved very poor.

We carry only this one strain of seed and in buying a large quantity the price is lower, but the quality is as high as ever.

Per Pkt., 20c; 1 Oz., \$1.50; $\frac{1}{4}$ Lb., \$5.75; Lb., \$22.50.

All Cauliflower seed will be treated with the Hot-water treatment.

Will have a large bed of Cauliflower Plants raised from the above strains of seed. Will be pleased to book your orders at any time. Prices always reasonable and ready to adjust them if changes occur.

Spray your Cauliflower and Brussels Sprout Plants with Nicotine Sulphate or dust with Nicotine Dust. They control Thrip and Lice.

CABBAGE SEED—LONG ISLAND GROWN

Greens and salads are rightly called "Nature's Tonics" because they contain mineral salts. The importance of these mineral salts in the diet cannot be overestimated. Greens and salads, such as Lettuce, Mustard, Spinach, Cabbage, Swiss Chard and Kale, are easily grown, have few insect pests and should be planted in variety and succession in every garden.

*Gradus Pea.*

PEAS

GRADUS and THOMAS LAXTON grow tall vines and very large pods. The LAXTONIAN is dwarf in vine and has large pods and lots of them. These are the three most popular sorts for market.

The RADIO, BLUE BANTAM, LITTLE MARVEL, CARTER'S DAISY and TELEPHONE are the gardener's favorites for table use and for canning.

I have over 125 bushels of choice new crop pea seed this season. The prices quoted below for bushel lots are cash prices. Add \$1.00 per bushel for time.

All the foregoing prices by the lb. and over are net, postage extra. See page 3 as to postal rates. Pkts. postpaid.

The above is as fine a collection of peas as you can find anywhere I am sure, and I have tried to list them in order of ripening. I advise you to select five or six kinds, plant the extra early ones as soon as you can, work the ground and then when ground is a little warmer plant the whole succession, sowing a late kind, 2 or 3 weeks later. That will keep you supplied with peas as long as they will develop properly.

CATSKILL SECTION.

November 20th, 1927.

In reply to yours of the 17th would say that I had the best yield of Brussels Sprouts yet from the Sterling Strain. Several of my neighbors who used the Sterling Strain said it proved better than other strains that they tried.

In testing the Kroemer's Erfurt Cauliflower I found in my late planting they were very fine, hardly a second. I thought this strain about as good as Catskill Snowball that most everyone uses up here. The season as a whole was a good average.

SEED POTATOES

Use 4 to 5 sacks to the acre.

My Seed Potatoes gave very good results last season. They did so well that we have bought over 5,000 sacks of seed to fill our requirements. We have a nice lot of Seed for Spring demand, both Cobblers and Green Mountains. All certified Seed. Handsome stock.

	Pk.	Bu.	Sack

IRISH COBBLERS, Prince Edward Island.....	.75	2.50	4.75
GREEN MOUNTAIN, Prince Edward Island.....	.75	2.50	5.00
GREEN MOUNTAIN, Maine Grown Seed75	2.50	5.50
GREEN MOUNTAIN, State Blue Tags90	2.80	5.75

Prince Edward Island and New York State Grown Seed comes in 150 lb. sacks. Maine Grown Seed is in 165 lb. sacks.

The above prices are net cash when you get the goods. Time prices are a matter of adjustment. Prices liable to change.

SEED OATS

Use 2 to 4 bushels to the acre.

My Seed Oats are very heavy and therefore it takes a few more pounds to sow an acre than it does of the lighter kinds, but the returns are so much more that it pays well.

SCOTTISH CHIEF. The best Oat that we have ever been able to purchase for this section. Very heavy and prolific. Per pk. of 8 lbs., \$.60; per bu. of 32 lbs., \$1.95.

WOLVERINE. A new kind. Excellent variety for a cheaper oat. Pk., \$.50; Bu. of 32 lbs., \$1.75.

SEED OATS by the bag. A very heavy Seed Oat packed in 80-lb. bags. Per bag, \$3.00.

If anyone wants to sow Oats for pasture or for plowing under, Seed Oats by the bag are the kind to use, but if you expect to thresh your crop use Scottish Chief or Wolverine. 2 or 3 extra bushels will pay for the extra cost of the seed.

SEED WHEAT

SPRING WHEAT. Marquis, the best Spring Wheat. Very prolific, early. Per pk. of 15 lbs., \$1.00; per bu. of 60 lbs., \$3.30.

WINTER WHEAT, for Fall Seeding. Leap's Prolific. The most prolific, hardy and satisfactory Wheat ever grown in this section. Red kernel, stiff straw, bald. Price on application.

SEED RYE

SPRING RYE, more suitable to sow in the Spring than the Rosen Rye. Fine seed. Per pk. of 14 lbs., \$.85; per bu. of 56 lbs., \$3.10.

SEED RYE FOR FALL SOWING. ROSEN RYE. This is the best and the cheapest in the end as it is cleaned and of high germination. Get my prices before ordering elsewhere.

VETCH and CANADA FIELD PEAS

WINTER VETCH. For Fall Sowing. Mix a little in with your Rye for a cover crop. We find that it pays. Price on application.

SPRING VETCH. For Sowing in the Spring for a cover crop to plow under for a late crop. Per lb., \$.12; 10 lbs. or more at \$.09 per lb. Mix with oats.

CANADA FIELD PEAS. For Sowing in Spring and early Summer for a cover crop to plow under for Cauliflower, Brussels Sprouts, etc. Both the Canada Field Peas and the Vetches are Legumes and add fertility to the soil. Inoculate the seed with Mulford Cultures if you are not sure they do well on your farm. Per 10 lbs., \$1.00; per bu. of 60 lbs., \$4.20. Use 1 bu. Peas and 1 bu. Oats to the acre.

SOJA or SOY BEANS

Have the best kind of Soy Beans for this section. Used for plowing under green to build up your soil, or for hay. Sow in May or June.

EARLY YELLOW. Quick maturing, very productive. Per 10 lbs., \$1.00; per bu. of 60 lbs., \$4.00.

COW PEAS

Used to improve the soil. Sow in May or June.

WHIP-POOR-WILL. The best kind for this section. Per 10 lbs., \$1.20; per bu. of 60 lbs., \$4.75.

Warning. Do not sow your Cow Peas, Soy Beans or Spring Vetch until your ground is warmed up a little. If sown too early they will fail to germinate, or if they do sprout, they will not thrive. They are also helped by inoculation. Use Mulford Cultures.

SUDAN GRASS

If you have lost out on your Summer's Hay crop sow an acre of this and get a heavy crop of succulent, valuable fodder.

We find this the best Grass for Pasture that we have ever tried. Use 15 to 20 lbs. with 1 bu. of Oats, on one acre of ground. Sow after ground warms up on good soil and this acre will keep one cow in good condition all Summer. 2 acres will keep 2 cows and so on.

For Hay use 20 to 25 lbs. to the acre, broadcast, or 10 lbs. in drills and cultivate. Crops of 5 tons to the acre have been grown. Northern seed. Per lb., \$.15; 10 lbs. or more, at \$.12 per lb.; 50 lbs. for \$5.00.

COSSACK ALFALFA

The surest and best kind of Alfalfa to grow. Here are a few reasons:

"It is the hardest Alfalfa known."

"A better soil builder than other Alfalfa."

"More drought resistant on account of the long tap root."

"Has a double root system, both branched and deep."

"Makes a finer quality hay."

"Will yield more hay per acre no matter what the weather conditions are."

"Freezing does not kill young plants. The branched roots keep them from heaving."

Use 10 to 15 lbs. to the acre. Inoculate the seed with Mulford Culture and sow on sweet soil. Lime will make your soil sweet. All our Alfalfa Seed is Northern grown. Per lb., \$.48; per 10 lbs. or more at \$.45 per lb.

GRIMM ALFALFA

This has been tried around here for the last few years and found to stand the Winter better than our Northwestern Alfalfa, but not quite so drought resistant. This seed comes from the Northwest, is over 99% pure and is Dodder free. 90% germinatoin. Same can be said of the Cossack.

Per lb., \$.48; per 10 lbs. or more, at \$.45 per lb.

Inoculate your Alfalfa Seed with Mulford Culture.

A good plan is to take 5 lbs. of each kind of Alfalfa that we have and mix together using 20 lbs. to the acre.

BUCKWHEAT

The best thing to sow on stump land, does well in sour soil. Fine for bees and to smother out bad weeds and quack grass.

JAPANESE BUCKWHEAT. The best kind to use in this section. Very prolific. Very large grain. Per 10 lbs., \$.75; per bu. of 48 lbs., \$2.50.

RAPE SEED

DWARF ESSEX RAPE. Makes a wonderful growth for seeding down hen yards, hog or sheep pastures. Per lb., \$.18; per 10 lbs. or more, at \$.14 per lb.; 50 lbs. for \$6.00.

Mix 10 lbs. Rape and 1 lb. Kale for your Duck Greens.

BARLEY

FANCY SIX ROW. Makes good pasture. Per 10 lbs., \$.50; per bu., \$2.30. Does not rust like oats.

February, 1927.

I wish to state that the seeds and plants bought of you in 1926 were entirely satisfactory.

H. B. SQUIRES.

GRASS, CLOVER and ALFALFA SEED

Prices liable to change without notice.

Terms strictly cash.

The Globe Brand is the very best grade of Grass, Clover and Alfalfa Seed on the market. I make my prices just as reasonable as is possible consistent with the quality. It is the very last fraction of 1% in purity that costs money. The best is what I am always looking for. I believe that it pays big returns, too, as it is truer in seeds than in anything else that "the best is none too good."

My Hay Mixture for one acre is 10 to 12 lbs. of Timothy, mixed with 6 to 8 lbs. Clover, part Red and part Alsike, or all Alsike if you prefer, and sow early in the Spring, alone, or with Oats, or in August and September. If sown in wheat, sow the Timothy in the Fall with the wheat, and the Clover in March or April following.

In sowing Timothy alone without Clover use 15 to 20 lbs. to the acre. If your land is sour and Grass and Clover does not do well as a rule, a little lime sown on top of the ground and harrowed in before sowing the seed would be a great help.

We do not handle foreign grown Clover Seed. All our Clover and Alfalfa Seed is grown in the U. S. A.

- STERLING MIXED LAWN GRASS. I prepare this mixture myself from the highest grade Kentucky Blue Grass, Fancy Red Top and White Clover and a little Creeping Bent. This mixture has given the very best satisfaction throughout Long Island. Quick growing and permanent. 25 lb. lots at 33 per lb.; 50 to 100 lb. lots at 32c per lb. \$.35 \$.38
- PARKWAY MIXTURE. This is my own mixture. It contains no White Clover but a nice lot of Creeping Bent. The finest of low growing grasses. 25 lbs. at 38c per lb.; 100 lbs. at 36c per lb.40 .45
- 6145 FORDHOOK FINEST LAWN GRASS. Burpee's best. A mixture of many fine Grasses suitable for lawns and contains none that makes bunches and clumps. 25 lbs. or more at 34c per lb.36 .40
- CREEPING BENTGRASS. *Agrostis Stolonifera* True. This is the very finest grade of the Bents and produces a weedless lawn, as it thrives on sour soil where weeds and other grasses will not grow65 .70
- CREEPING BENT STOLENS. These are the long spreading roots cut into short pieces and by using them you can get a lawn where seed will not germinate. If you have had poor luck getting a good lawn started try these stolens. Use 1 sq. foot of stolens for 8 sq. ft. of lawn. 5 sq. ft. \$1.75; 100 sq. ft. \$25.00.
- 6149 SHADY NOOK. Where there is only partial shade the other Lawn Grasses are all right but where the shade is quite dense use this special mixture .36 .40
- WHITE CLOVER. Very best grade45 .50
- FANCY RED TOP. Re-cleaned. Fancy22 .25
- KENTUCKY BLUE GRASS. Best grade28 .31

For a good, permanent lawn, use 1 lb. lawn seed to 400 sq. feet, 80 to 100 lbs. to the acre. For reseeding an old or poor catch, use half that amount. For quick results use a heavier seeding.

LAWN MAKING

Lawn making has been reduced to a science by the Department of Agriculture. Experiments have demonstrated that the stand-by of lawns in this country, where lawns can be made, is Kentucky Blue Grass; and that the best method of obtaining a Blue Grass lawn is to sow a mixture containing Red Top. The latter germinates more quickly, and helps make a thick lawn the first few years, but gradually gives way to the spreading blue grass. White clover is usually mixed in, where clover is not objectionable, because it helps thicken the early turf, and secretes nitrogen from the air, which helps the grass. Our grass seed is exactly what we represent, recleaned and free from weeds.

Loosen the soil in which a new lawn is to be made to a depth of at least five inches, and lighten it with humus or several inches of sand, compost or manure if it is heavy and inclined to bake. Apply fertilizer liberally, either Sheep Manure, Bone Meal, V. C. Fairway or a commercial fertilizer.

Sow in the early spring when cool weather and ample rainfall will insure complete germination and a good start for the seedlings before hot dry weather comes. If seeding must be delayed, special precautions must be taken to prevent the ground drying out. Early fall is a very desirable time to plant.

See that the seed is well covered. Rake it into a new seed bed and roll so that the soil is firmed over the seed. Where seed is sown on an old lawn always cover it with a top dressing of sand or soil and fertilizer. Seed thrown on the top of hard ground has no chance to grow and will merely wash off.

Use lime if you think soil is inclined to be sour. If sorrel comes in natural it is a sign of a lack of lime.

HUMUS

This is one of the best Lawn Makers, especially for poor soils.

Mix 100 lbs. of this Dry Humus to a plot 20 by 20 and see the wonderful way the grass will grow where it is used. Also fine for spading in your flower beds, only use it in a larger proportion than above.

A TRIBUTE TO STERLING'S ANNUAL FLOWER PLANTS FROM ONE WHO HAD THE FINEST FLOWER GARDEN IN THIS SECTION.

October 3rd, 1927.

After great success with your flower plants for years at my summer home at New Suffolk, this season, I think, tops them all.

I had one bed about four hundred feet long with Summer Cosmos, Zinnias, Marigold (both lemon and orange), some Straw-flowers, Petunias and Asters with a privot hedge for a background which made a wonderful picture. It was very much admired. Also had one large bed of Asters several colors. Some of the Zinnias grew the size of a saucer and the Marigolds would fill a tea cup. These flowers have been in bloom almost three months and will continue until frost, except the Asters which are about through.

I still have the Chrysanthemums purchased from you several years ago and they look like a big crop, but not open as yet.

Certainly setting out your plants instead of sowing seed makes for the best results.

Hope to have my order in early next season.

CORNELIUS HEARN.

PLANT DEPARTMENT

STRAWBERRY PLANTS

Sterling Quality

My Strawberry Plants are raised on fresh ground, well fertilized and carefully taken care of. They are well rooted, healthy and true to name. We have tried out many, many kinds and find that only a few kinds seem to do well in this section. Such a kind is the Premier. This kind comes early and stays late, yields heavy and keeps its size well. The Corsican and Rykeman are both very popular for mid-season, being large, sweet and very prolific. We have yet to find an extra good late berry for this section. Gandy is good, but has its faults. Chesapeake is a very shy bearer with us, but extra inequality. All plants are from a new bed. No old plants are ever sold by me.

Price List of Sterling's Strawberry Plants

	25	100	300	1000
CAMPBELL'S EARLY. Matures its crop very early. The best extra early kind we have found	\$.25	\$.80	\$ 2.10	\$ 6.00
PREMIER or HOWARD, NO. 17. The best kind I have ever tried for table use or for market. Begins to ripen early; large, long red berries and keeps right on through the longest season of any berry found yet, and keeps its size and color well, right up to the end of the season. Everybody is praising Premier and there's a reason. If you can only have one kind this is the kind to have..	.30	.80	2.10	6.00
See Mr. Fickeissen's testimonial.				
RED GOLD. Called by the originator a week earlier than Premier and equally as good. Something new.	1.00	3.00		
DR. BURRILL. An Improved Senator Dunlap-dark red, large, good flavored berries. Makes plenty of plants and always yields well30	.80	2.10	6.00
RYKEMAN. Considered by some the same as Corsican, and by others even better than that fine stand-by. This is true stock that I secured from an enthusiastic Rykeman grower	.30	.90	2.40	7.00
CORSICAN. One of the sweetest berries grown. Large plants, leaves and berries, fruit stems long and stiff. Very productive	.30	.90	2.40	7.00

STRAWBERRY PLANTS—*Continued*

	25	100	300	1000
JUDITH. Fine quality, almost equal to Marshall30	.90	2.40	7.00
BIG JOE. Mid-season, large berries, firm and productive. Runs small towards the end of the season30	.80	2.10	6.00
COOPER. A good sort in some sections. Large and fairly good flavor30	.90	2.40	
WILLIAM BELT. High quality. Where it does well it certainly is fine, but it sometimes blights, rusts and gets knotty30	.90	2.40	7.00
MONROE. An improved Brandywine. Very dark red40	1.00		
PEARL. Another new kind, said to be the best late kind yet found80	2.50		
MARSHAL. This is the straight Hope Farm Strain, direct from Mr. Collingwood. They are considered the best quality berry there is, but not a real heavy yielding berry. Dark red. Keep in hills for best results40	1.25	3.00	9.00
CHESAPEAKE. One of the best for late where it will do well. We never had it do well for us yet40	1.25	3.00	9.00
GANDY. The standard for late. Sour and firm. One of the best for shipping. Does not yield heavy30	1.00	2.90	8.00
Have tried to list the 15 kinds named above about in their order of ripening.				

All kinds have perfect blossoms and can be set alone if desired.

Have made the descriptions for these varieties as truthful as it is possible to do with such a variable fruit as the Strawberry. You have to try out the varieties for yourself to find what does well in your soil. The Premier is the only kind that I have found yet that does well for everybody.

EVERBEARING STRAWBERRY PLANTS

MASTODEN. The largest and best Fall bearing berry we have tried yet. Per doz., 60c; per 3 doz., \$1.50; per 100, \$3.00.

CHAMPION. Perfect blossom, very sweet berry. Set the plants this Spring, keep all blossoms pinched off until July and then thin the blossoms out 40% right through the rest of the season. You will then have good-sized berries of fine flavor right up to freezing weather and another crop the following Spring. Plants per doz., \$.40; per 3 doz., \$1.00; per 100, \$2.00.

All prices quoted above are net at the farm. If you want your Strawberry Plants sent by Parcel Post add 8c per 25, 15c per 100, 20c per 200, 25c per 300; quantities over that should be sent Postage C. O. D.

Strawberry Plants in August, September and October

We will have about all the kinds listed and some new kinds as well for Summer and Fall setting, from our new bed. New plants, well rooted and true to name.

The price for Summer and Fall is higher than Spring prices, but I try to make the price as reasonable as possible and I think you will grant that, when you consider that one, two or sometimes three smaller plants have to be thrown away and wasted in order to get one good, strong, well-rooted plant.

Write for prices.

RASPBERRY PLANTS

CUTHBERT. One of the best for this section. Prolific, large, sweet berries. Makes plenty of plants. Per doz., \$1.00; per 2 doz., \$1.75; per 3 doz., \$2.25; \$5.00 per 100.

ST. REGIS. Everbearing. The best everbearer yet found. Price same as Cuthbert.

VICTORY. An improved Cuthbert. Very fine. Per doz., \$1.00.

CUMBERLAND. The best Black Cap Raspberry. Large, firm, delicious. Nice plants, per doz., \$1.00; per 3 doz., \$2.50.

BLACKBERRY PLANTS

MERSEREAU. The best Blackberry for this section. Large, fine flavor, and quite free from rust and disease. Per doz., \$1.00; per 3 doz., \$2.50.

IMPROVED MARY WASHINGTON. Selected by a farmer just outside of Boston. He grows as fine Asparagus as is shipped in to Boston market25	1.50	12.00
MARY WASHINGTON. Two-year old roots. These will make large shoots, ready to cut next year30	1.75	14.00

All expert gardeners and farmers will tell you that one year old Asparagus Roots are the best kind to set out for field culture. One year old roots recover quickly from the shock of transplanting and are not badly cut and broken. Set out Sterling Grown Roots this year, about six inches below the surface of the ground, cover with two inches of soil. As the plants grow up fill trench with well rotted manure and more soil, and some good garden fertilizer on top of that. Do not put fertilizer next to any kind of root or plant if you want them to live.

If properly taken care of you can cut your bed the following Spring until June 1st, letting it grow up after that and giving it more manure and fertilizer. The second year from setting cut till July 1st, always feeding it well after letting it grow up.

MAGGOT CONTROL

You can raise fine Cabbage without damage from Maggots if you will follow the directions given below:

To 5 gallons of water add $\frac{1}{2}$ oz. Formaldehyde. After mixing thoroughly, pour about a tablespoonful around each plant once a week. Begin to do this by the last of May or as soon as you see the Maggot Fly.

OR

Add 1 oz. Corrosive Sublimate to 8 gallons water. Put $\frac{1}{2}$ cupful to each plant once a week at the same time as above.

The poisons may be purchased at any drug store.

SULFOCIDE

A Better Summer Spray

1 5-gal. can in case	8.75
1 gal. can in case	2.75
1 qt. can	1.00
1 pint can70

Freight paid to any R. R. station on Long Island on orders of 5 gallons. or over.

Sulfocide is a powerful summer fungicide—at low cost—for fruits, vegetables and flowers. When sprayed, it quickly decomposes leaving a film of sulfur so fine as to be almost invisible except where drops accumulate.

1 qt. makes 50 gals. of spray
1 gal. makes 200 gals. of spray

Add $\frac{1}{2}$ lb. Kayso to each 50 gals. of spray, putting it in the tank first.

KAYSO

Use KAYSO in All Your Sprays for All Spraying

KAYSO makes the spray spread in an even, unbroken coat over every surface, thereby giving better control of pests and diseases—makes the spray mixture or solution apply easily and cover quickly—causes the spray to set instantly and dry rapidly without excessive run-off waste—gives increased coverage. The surface wets instantly—the film becomes fixed the moment it forms—it does not drain or continue to spread, or get thinner.

Try a small amount in some of your spray work, and prove its worth in an actual test. Use it in your dormant spray as well as in the Summer Spray. In the Field as well as in the Orchard. Not necessary in Scalecide.

Packed in the following sizes—I keep in stock up to 10 lb. pkgs.

NICOTINE SULPHATE

Same as Black Leaf 40. 40% Nicotine.

The Liquid Spray that controls Plant Lice or Aphis. Put $\frac{1}{2}$ lb. to 50 gals. water, add 6 or 8 ozs. of Kayso and you have one of the best controls there is for sucking insects.

Per 1 oz. Bottle, for garden use	\$.35
Per $\frac{1}{2}$ lb. Tin, makes 50 gals.	1.25
Per 2 lb. Tin	3.50
Per 10 lb. Tin	13.50

Special price on larger quantities.

NICOTINE DUST

The dry powdered Nicotine Sulphate. Dust it on in the heat of the day and it forms a gas and will kill all insects, if thoroughly applied. Per lb. 25c; 10 lbs. at 22c per lb., 100 lb. drums at 19c per lb. Price liable to change.

FINE GROUND SULPHUR

For dusting Potatoes, Spraying and spreading on the land for Potato Scab.

Sublime Sulphur. The finest and purest. 100% pure. 1 to 4 lbs. at 10c per lb.; 5 to 99 lbs. at 7c per lb.; 100 lb. bags at 5½c per lb.

Commercial Sulphur. 99½% pure. Use one lb. of this or ½ lb. of the Sublime to 1 bu. of seed as you cut your potatoes and you will gradually work out of the Scab. 1 to 4 lbs. at 7c per lb.; 5 to 99 lbs. at 4c per lb.; 100 lb. bag at 3c per lb.

SCALECIDE

THE COMPLETE DORMANT SPRAY

"Makes a Tree Outgrow Its Troubles"

Fall spraying with Scalecide controls psylla and peach leaf curl. Spring application controls aphids, pear thrips, leaf miner, case bearer and leaf roller. Either fall or spring spraying with Scalecide controls scale, bud moth, European red mite, fungus or blight cankers from which are spread fire blight, collar rot and root rot. And in addition, year after year use of Scalecide invigorates the trees.

I had the best crop of Strawberries that I ever raised from the plants I got from you last year. I never saw such a sight of berries in my life. They were the good old Corsican, they lead the world. There is no berry can touch them. Can get five cents more per quart for them. The greatest berry in the world.

LEWIS R. EDWARDS.

MULFORD CULTURES

Alfalfa plant on left not inoculated. Plant on right inoculated with Mulford Culture for Alfalfa. All other conditions identical. This contrast speaks for itself.

If your crops of Clover, Alfalfa, Lima Beans, Garden Beans, Peas, Sweet Peas and other Legumes do not thrive, it indicates that your soil is lacking in Bacteria. Mulford Cultures used on the seed will supply these very necessary Bacteria.

If you use a little lime on your soil and Mulford Cultures on your seed there is no kind of Legume that you cannot grow.

These Cultures are the best that science can produce as the Mulford Co. manufactures vaccines, etc., for the U. S. Government.

There is a different Culture for each of the different kinds of Legumes, so be sure to state what crop you wish to inoculate.

Cultures for Garden, Field and Cow Peas, Garden Beans, Lima Beans, Clovers, Alfalfa, Soy Beans, Vetches and Sweet Peas always on hand. Other kinds can be gotten on very short notice.

FERTILIZER DEPARTMENT

"SUNRISE BRAND"

We are the Authorized Agents for the Long Island Produce and Fertilizer Co. of Riverhead and Southold, L. I., for this section.

They manufacture the "Sunrise Brand" of Fertilizer which has given such good satisfaction in Suffolk County.

The different analyses that they manufacture are as follows:

5% Ammonia, 8% Phos. Acid, 5% Potash.

4% Ammonia, 8% Phos. Acid, 7% Potash.

5% Ammonia, 8% Phos. Acid, 6% Potash.

6% Ammonia, 9% Phos. Acid, 5% Potash.

10% Ammonia, 16% Phos. Acid, 8% Potash.

The prices vary as to analysis and the time that you pay for the fertilizer. They have Fish Scrap in their different mixtures which improves the mechanical mixture of it and the Plant Food value. I will take your general order to be delivered from Riverhead or Southold or you can get a few ton from my own storage at any time if in need, at short notice. The 5-8-6 is a Special Cauliflower Mixture which has been tried in this section and found very satisfactory. Would be pleased to receive your orders.

REAL ESTATE

CARRINGTON PARK

Four lots on Nassau Point. These are very large, high lots covered with large oak trees, carefully trimmed out to make a fine Park-like effect. Each lot has over 100 feet frontage on Little Peconic Bay Road, a 3-rod road recently accepted and rebuilt by the town. They are only a few steps from the Cove, the deepest water near the Point, and the best anchorage in Peconic Bay.

These lots are Nos. 421, 422, 423, 424, situated just south of where Vanston Road turns west and Little Peconic Road begins.

This Block would make a fine Estate if one wanted a big place, or I will sell the lots separately.

Price of single lots \$25.00 per front foot.

Price for the Block of four lots, \$22.00 per front foot.

Terms reasonable.

TURTLE POND

Two lots, Nos. 225 and 226, extending from Wunneweta Road on the east to Wunneweta Pond on the west.

These lots are very near the Nassau Point Hotel and each one has

a frontage of about 100 ft. on the water. There is good high frontage on the water, with a very pretty view and suitable for two Bungalows. Large oak trees cover the whole tract.

A 15-foot Right of Way bounds lot No. 226 on the north and there is a small fresh water pond on this lot which I am planting to all kinds of water plants. These lots are very suitable for a Rock and Water Garden and could be made one of the beauty spots of the Point.

Price of these lots, \$25.00 per front foot, on the water.

Nassau Point Club Properties have been wise enough to reserve a 15-foot strip all around Nassau Point above high-water mark. This makes the whole water-front available to any one living anywhere on the Point. The Club also has large Bathing Houses on the East Bay and on the West Bay and a 320-ft. dock on the East Bay.

TUTHILL WOODS

A tract of 16 acres of woodland with a frontage of 323 feet on the north side of the Middle Road, about 90 rods east of Depot Lane.

This tract is owned by Mr. Frank McBride and myself and we expect to run a three-rod road through the center. This will give us four nice lots on the Middle Road and about 50 lots with 75 feet frontage on this three-rod road which we will call Tuthill Avenue. We will sell these lots singly or by the acre, as you wish, and the price will be very reasonable.

MAIN ROAD LOTS

Pequash Corner: A large corner plot situated at the corner of Pequash Avenue and the Main Road.

This lot has a frontage on the Main Road of 208 feet and 200 feet on Pequash Avenue. It is situated very near the center of the village and in the fastest growing section of Cutchogue. There were eight new homes built within a short distance of this corner in the past year, the cellar is dug for another and several more in contemplation. A fine corner for a new business section, as Pequash Avenue leads to one of the most popular Summer Cottage settlements in Southold Town, Fleet's Neck. At this writing there is a mud digger digging out the channel for a large yacht club which is to be erected on the West Creek.

Parsonage Lot. This is where the M. E. Parsonage has stood for the past 20 years. The new Parsonage is directly in front of the M. E. Church. This lot has a good high frontage on the Main Road of about 93 feet. It is 365 feet deep and runs to a point at the back. The cellar is excavated and there is a grease trap and cesspool all ready to be hooked up to. Price very reasonable.

Remember that I own all this property, I am not a Broker.
